Work Experience

SAP Analyst - Capgemini - Enterprise SAP services, Bengaluru **Oct 2025 - Present**

- **SAP Data Analysis & Reporting:** Extracted and reconciled master and transactional data from SAP (SE16N, SQVI, standard and custom reports) into Excel and SQL; built **15+** recurring business reports and cut report turnaround from ~2 days to under **4 hours**.
- **AI-Driven Automation:** Used ChatGPT, Claude and GitHub Copilot to generate and maintain Python (Pandas) and Excel VBA / Power Query scripts that automate daily data validation, report refreshes and ticket summaries, saving **8-10 hours/week** and reducing manual errors by **~90%**.
- **Ticket & Incident Analytics:** Analysed **1,200+** support tickets, clustered the top 5 root causes and partnered with functional teams to cut repeat incidents by **25%** and improve SLA resolution time by **20%**.
- **Data Quality & Migration:** Validated **50K+** records across data loads and cutovers using reconciliation checks and duplicate / anomaly detection, achieving **99.5%** data accuracy.
- **Dashboards & KPIs:** Built Power BI and Tableau dashboards tracking SLA compliance, ticket ageing and data-load KPIs for **3** stakeholder groups, replacing weekly manual status decks.

Skills

* Elementary proficiency

- SQL (MySQL, SQL Server, PostgreSQL)
- Python (Pandas, NumPy, Matplotlib, SciPy, Scikit-learn*)
- Tableau | Microsoft Power BI | Google Data Studio
- Excel (Advanced, Power Query, VBA) | Google Analytics*
- SAP (S/4HANA, BTP / CAP, SE16N / SQVI, data loads, ticket management)
- AI & Automation (ChatGPT, Claude, GitHub Copilot, prompt-driven scripting)
- Statistical Tests (A/B testing, T-test, Z-test, ANOVA)
- ML Algorithms (Linear, Logistic regression)
- Java | C++ | HTML / CSS
- Data Cleaning, EDA, KPI Design, Root-Cause Analysis

Projects

Olympic Games Analysis: link

- Cleaned, loaded and preprocessed Summer Olympics data (**1960-2016**) with **Pandas**; engineered new columns and applied **multi-indexing, merging, grouping and aggregation** for descriptive statistical analysis of athletes, countries and medals.
- Built an interactive **Tableau** dashboard covering medal distribution of the top 30 countries, participation trends and sex ratio by country and year.

CarDekho Dataset Dashboard: link

- Analysed **~4,500 rows** of CarDekho marketplace data from **Kaggle**, spread across multiple files, using Pandas (dropna, loc / iloc, groupby, **MultiIndex**) for cleaning, slicing, sorting and aggregation.
- Designed a dynamic **Tableau** dashboard and summary report on price, fuel type, ownership and selling trends to support purchase and pricing decisions.

Cost of Living Analysis: link

- Designed and deployed a local **MySQL database** with **triggers** for data safety and **stored procedures** for early-stage transformation; extracted data with **JOIN, UNION, VIEW, subqueries and window functions** and validated completeness in SQL.
- Created a dynamic dashboard comparing income and expense parameters across countries from **2000 to 2023**.

Price Prediction Linear Model:

- Cleaned, sliced and transformed housing data with Pandas and built a localised **linear regression** model in **Scikit-learn** to predict house prices; used LLM assistance to review feature selection and validate the pipeline.

Education

BACHELOR OF TECHNOLOGY (**B.TECH**), Computer Science Engineering - **Chandigarh Group of Colleges**, Landran **2021 - 2025**

CGPA 8.37 | Intermediate (CBSE) 89.4% and Matriculation (CBSE) 94%, D.G.V Sr. Sec. School, Rohtak

Certifications & Activities

- **SAP Generative AI Certification** | **SAP Cloud Backend Developer Certification** (SAP BTP, Cloud Application Programming Model).
- **React Certification** (Solitaire Infosys) | **Linux Certification** | Workshop on **Python & Artificial Intelligence** | Seminar on Cyber Security.
- Participant: **The Quiz Lords 2023**, Mind Drill Competition and National Science Day (college level).
